

Wiscat-Pabo aftrekken breuken

Breng steeds één hele onder de noemer

$$1) 3\frac{3}{8} = 2\frac{11}{8}$$

$$2) 14\frac{5}{36} = 13\frac{41}{36}$$

$$3) 11\frac{7}{9} = 10\frac{16}{9}$$

$$4) 1\frac{4}{32} = \frac{36}{32}$$

$$5) 2\frac{4}{8} = 1\frac{12}{8}$$

$$6) 15\frac{7}{21} = 14\frac{28}{21}$$

$$7) 11\frac{5}{12} = 10\frac{17}{12}$$

$$8) 3\frac{5}{20} = 2\frac{25}{20}$$

Bereken de volgende aftrek-sommen.

Schrijf de berekeningen goed op!

Zorg daarbij natuurlijk dat er links en rechts van een = -teken iets gelijkwaardigs staat.

$$1) \frac{2}{3} - \frac{2}{7} = \frac{14}{21} - \frac{6}{21} = \frac{8}{21}$$

$$2) 7\frac{2}{5} - 1\frac{1}{20} = 7\frac{8}{20} - 1\frac{1}{20} = 6\frac{7}{20}$$

$$3) 5\frac{1}{9} - \frac{2}{9} = 4\frac{10}{9} - \frac{2}{9} = 4\frac{8}{9}$$

$$4) 23\frac{1}{6} - 2\frac{1}{2} = 23\frac{1}{6} - 2\frac{3}{6} = 22\frac{7}{6} - 2\frac{3}{6} = 20\frac{4}{6} = 20\frac{2}{3}$$

$$5) 2\frac{7}{12} - 1\frac{3}{4} = 2\frac{7}{12} - 1\frac{9}{12} = 1\frac{19}{12} - 1\frac{9}{12} = \frac{10}{12} = \frac{5}{6}$$

$$6) \frac{27}{40} - \frac{3}{8} = \frac{27}{40} - \frac{15}{40} = \frac{12}{40} = \frac{6}{20} = \frac{3}{10}$$

$$7) 17\frac{3}{4} - 5\frac{9}{16} = 17\frac{12}{16} - 5\frac{9}{16} = 12\frac{3}{16}$$

$$8) 22\frac{1}{3} - 21\frac{5}{8} = 22\frac{8}{24} - 21\frac{15}{24} = 21\frac{32}{24} - 21\frac{15}{24} = \frac{17}{24}$$

$$9) 23\frac{2}{7} - 5 = 18\frac{2}{7}$$

$$10) \frac{1}{2} - \frac{1}{3} = \frac{3}{6} - \frac{2}{6} = \frac{1}{6}$$

$$11) 1\frac{3}{100} - \frac{1}{10} = 1\frac{3}{100} - \frac{10}{100} = \frac{103}{100} - \frac{10}{100} = \frac{93}{100}$$

$$12) 7\frac{7}{100} - 3\frac{2}{5} = 7\frac{7}{100} - 3\frac{40}{100} = 6\frac{107}{100} - 3\frac{40}{100} = 3\frac{67}{100}$$

$$13) 2\frac{3}{100} - \frac{31}{1000} = 2\frac{30}{1000} - \frac{31}{1000} = 1\frac{1030}{1000} - \frac{31}{1000} = 1\frac{999}{1000}$$

$$14) 1\frac{1}{8} - \frac{2}{5} = 1\frac{5}{40} - \frac{16}{40} = \frac{45}{40} - \frac{16}{40} = \frac{29}{40}$$

$$15) 25\frac{1}{7} - 24\frac{3}{7} = 24\frac{8}{7} - 24\frac{3}{7} = \frac{5}{7}$$
